## ORIGIN PROVISIONS OF TRADE AGREEMENTS

**ANNEX I OF THE PROTOCOL  
ON TRADE OF THE SADC****Concerning The Rules of Origin For Products To be Traded Between The Member States of The Southern African Development community**

The High Contracting Parties

**AWARE** that they have undertaken to progressively establish a Development Community within which Customs duties and other charges of equivalent effect imposed on imports shall be gradually reduced and eventually eliminated and non-tariff barriers to trade among Member States shall be removed, and all trade documents and procedures shall be harmonized;

**RECOGNIZING** that clear and predictable rules of origin and their application should facilitate the flow of regional trade and economics of scales in the Region;

**RECOGNIZING** that it is desirable to provide for transparency of laws; regulations and practices regarding rules of origin and that the scope of this Annex is to provide for a consolidated text, incorporating all provisions concerning the origin of goods, within the context of this Protocol, and aimed at facilitating implementation and administration of these rules;

**DESIREING** to ensure that rules of origin themselves do not create unnecessary obstacles to trade and facilitate the implementation thereof by Customs administrations by providing an exhaustive and complete text;

**TAKING INTO ACCOUNT** the provisions of Article 12 of this Protocol which require that the rules of origin for products that shall be eligible for Community treatment shall be set out in Annex I to this Protocol;

**HEREBY AGREE** as follows:

## RULE 2

### ORIGIN CRITERIA

#### 1. General requirements

For the purpose of implementing this Protocol, goods shall be accepted as originating in a Member State if they are consigned directly from a Member State to a consignee in another Member State and;

- (a) they have been wholly produced in any Member State as provided for in Rule 4 of this Annex; or
- (b) they have been obtained in any Member State incorporating materials, which have not been wholly produced there, provided that such materials have undergone sufficient working or processing in any Member State within the meaning of paragraph 2 of this Rule.

#### 2. Sufficiently worked or processed products

- (a) For the purpose of this Rule, products, which are not wholly produced, are considered to be sufficiently worked or processed when the conditions set out in the list in Appendix I of this Annex are fulfilled.
- (b) The conditions referred to in sub-paragraph (a) indicate, for all products covered by this Protocol, the working and processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in this list, is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.
- (c) Notwithstanding the provisions of sub-paragraph (a), products of HS chapters 50 to 63 exported to SACU by MMTZ Member States will be considered to be sufficiently worked or processed when the conditions set out in column 4 of the list in Appendix I are fulfilled, subject to such quantitative limits, time periods and arrangements for the administration and enforcement of such quantitative limits as agreed upon by the CMT on 4 August 2000.

#### 3. Value tolerance

- (a) Notwithstanding the provisions of paragraph 2(b) of this Rule, non-originating materials which, according to the conditions set out in the list in Appendix I, should not be used in the manufacture of a product may nevertheless be used, provided that:
  - (i) their total value does not exceed 10 percent of the ex-works price of the product; and
  - (ii) any of the percentages given in the list for the maximum value of non-originating materials are not exceeded through the application of this sub-paragraph.

- (b) The provisions of sub-paragraph (a) shall not apply to the products falling within HS chapters 50 to 63, 87 and 98.

**4. Cumulative treatment**

- (a) For the purposes of implementing this Annex, the Member States shall be considered as one territory.
- (b) Raw materials or semi-finished goods originating in accordance with the provisions of this Annex in any of the Member States and undergoing working or processing either in one or more Member States shall, for the purpose of determining the origin of a finished product, be deemed to have originated in the Member State where the final processing or manufacturing takes place.

**RULE 3**

**PROCESSES NOT CONFERRING ORIGIN**

Notwithstanding the provisions of paragraph 1(a) of Rule 2 of this Annex, the following operations and processes shall be considered as insufficient to support a claim that goods originate in a Member State:

**1. Packing, packaging and other preparations or processes for shipping and for sales:**

- (a) packing, repacking or retail packaging, including bottling, placing in flasks, bags, cases and boxes, fixing on cards or boards and all other simple packing operations;
- (b) changes of packing and breaking up or assembly of consignments;
- (c) operations to ensure the preservation of merchandise in good condition during transportation and storage, such as ventilation, spreading out, drying, freezing, making into a solution, removal of damaged parts and similar operations. This also includes loading, reloading or any other operation necessary to maintain the merchandise in good condition.

**2. Mere dilution, blending and other types of mixing:**

- (a) simple mixing of ingredients imported from outside the Member States;
- (b) mere dilution with water or another substance that does not materially alter the characteristics of the material;
- (c) the addition of substances such as anti-caking agents, preservatives, wetting agent and the like;
- (d) diluting chemicals with inert ingredients to bring them to the standard degree of strength;
- (e) for the purposes of this sub-paragraph, dilution shall be taken not to include:
- (i) either mixing together of two bulk medicinal substances followed by the packaging of the mixed products into individual doses for retail sale; or
  - (ii) the addition of water or another substance to a chemical compound under pressure, which results in a reaction in creating a new chemical compound.

**3. Simple assembly or combining operations**

**4. Other minor operations**

- (a) ornamental or finishing operations incidental to textile production designed to enhance the marketing appeal or ease the product's case, such as simple hand dyeing and printing, embroider and appliqué, pleating, hemstitching, stone or acid washing, permanent pressing, or the attachment of accessories, finding and trimmings. The rules of origin for products of HS chapters 50 to 63 exported to SACU b MMTZ Member States, according to the provisions of paragraph 2(c) of Rule 2, may allow minor operations that would otherwise be non-origin conferring processes;
- (b) dismantling or disassembly;
- (c) repairs and alterations, washing, laundering or sterilization;
- (d) application of preservatives or decorative coatings, including lubricants, protective encapsulation, preservative or decorative paint or metallic coatings;
- (e) testing, sorting or grading;
- (f) marking, labeling or affixing other like distinguishing signs on products or their packages;
- (g) simple operations such removal of dust, sifting or screening, sorting, classifying and matching, including the making up of sets, goods, greasing, washing, painting or cutting up.

**5. Slaughter of animals.**

- 6. Any process or work in respect of which it may be demonstrated, on the basis of the preponderance of evidence, that the sole objective was to circumvent these rules**
- 7. A combination of two or more insufficient working or processing operations does not confer origin, regardless of whether the product-specific rules of origin have been satisfied or not.**
- 8. All the operations carried out in the Member States on a given product shall be considered together when determining whether they are to be regarded as insufficient within the meaning of this Rule.**

**RULE 4****GOODS WHOLLY PRODUCED IN THE  
MEMBER STATES**

- 1. For the purposes of paragraph 1(a) of Rule 2 of this Annex, the following shall be regarded as wholly produced in the Member States:
  - (a) Mineral products extracted from their ground or seabed;
  - (b) Vegetable products harvested there;
  - (c) Live animals born and raised there;
  - (d) Products obtained there from live animals;
  - (e) Products obtained by hunting or fishing conducted there;
  - (f) Products of sea fishing and other products taken from the sea by their vessels;

- (g) Products made on board their factory ships exclusively from products referred to in paragraph (f);
  - (h) Used articles collected there fit only for the recovery of raw materials
  - (i) Waste and scrap resulting from manufacturing operations conducted there;
  - (j) Products produced there exclusively from one or both of the following:
    - (i) products specified in sub-paragraphs (a) to (i);
    - (ii) materials containing no element imported from outside the Member States or of undetermined origin.
2. In determining the place of production of marine, river, or lake products and goods in relation to a Member State, a vessel of a Member State shall be regarded as part of the territory of that Member State. In determining the place from which goods originated, marine, river or lake products taken from the sea, river or lake or goods produced therefore at sea or on river or lake shall be regarded as having their origin in the territory of a Member State and have been brought directly to the territory of the Member State.
3. For the purpose of this Annex, a vessel shall be regarded as a vessel of a Member State if it is registered in a Member State and satisfies one of the following conditions:
- (a) The vessel sails under the flag of a Member State;
  - (b) At least 75 percent of the officers and crew of the vessel are nationals of a Member State;
  - (c) At least the majority control and equity holding in respect of the vessel are held by nationals of a Member State or institution, agency, enterprise or corporation of the Government of such Member State.
4. Electrical power, fuel, plant machinery and tools used in the production of goods shall always be regarded as wholly produced within the Region when determining the origin of the goods.

## **RULES 5**

### **UNIT OF QUALIFICATION**

- 1. Each item in a consignment shall be considered separately.
- 2. Notwithstanding the provisions of paragraph 1 of this Rule;
  - (a) Where the Harmonised System specifies that a group, set or assembly of article is to be classified within a single heading, such a group, set or assembly shall be treated as one article;
  - (b) Tools, parts and accessories which are imported with an article, and the price of which is included in that of the article or for which no separate charge is made, shall be considered as forming a whole with the article, provided that they constitute the standard equipment customarily included in the sale of articles of that kind;
  - (c) Notwithstanding the provisions of sub-paragraphs (a) and (b) of this paragraph, goods shall be treated as a single article if they are so treated for purposes of assessing Customs duties on like articles by the importing Member State.

3. An un-assembled or dis-assembled article, which is imported in more than one consignment because it is not feasible for transport or production reasons to import it in a single consignment, shall be treated as one article.

#### **RULE 6**

##### **SEPARATION OF MATERIALS**

1. For those products or industries where it would be impracticable for the producers to separate physically materials of similar character but different origin used in the production of goods, such separation may be replaced by an appropriate accounting system which ensures that no more good are deemed to originate in the Member State than would have been the case if the producer had been able to physically separate the materials.
2. Any accounting system shall conform to such conditions as may be agreed upon by the CMT in order to ensure that adequate control measures shall be applied.

#### **RULE 7**

##### **TREATMENT OF MIXTURES**

1. In the case of mixtures, not being groups, sets or assemblies of goods dealt with under Rule 5, any product resulting from the mixing together of goods originating in the Member States with goods which would not qualify as originating in the Member States, would not qualify as originating if the characteristics of the product as a whole are not different from the characteristics of the good which have been mixed.
2. In the case of particular products where it is recognized by the CMT to be desirable to permit mixing of the kind described in paragraph 1 of this Rule, such products shall be accepted as originating in the Member States in respect of such part thereof as many be shown to correspond to the quantity of goods or originating in the Member States used in the mixing, subject to such conditions as may be agreed by the CMT.

#### **RULE 8**

##### **TREATMENT OF PACKING**

1. Where for purposes of assessing Customs duties, a Member State treats the origin of the goods separately from the origin of the packing, it may also, in respect of its imports consigned from another Member State, determine separately the origin of such packing.
2. Where paragraph 1 of this Rule is not applicable, packing shall be considered as forming a whole with the goods and no part of any packing required for their transport or storage shall be considered as having been imported from outside the Member States when determining the origin of the goods as a whole.
3. For the purposes of paragraph 2 of this Rule, packing with goods, which are ordinarily sold at retail, shall not be regarded as packing required for the transport or storage of goods.
4. Containers, which are purely for the transport and temporary storage of goods and are to be returned, shall not be subject to Customs duties and other charges of equivalent effect. Where containers are not to be returned, they shall be treated separately from the goods contained in them and be subjected to Customs duties and other charges of equivalent effect.

**RULE 9****DOCUMENTARY EVIDENCE**

1. The claim that goods shall be accepted as originating from a Member State in accordance with the provision of this Annex shall be supported by a certificate given by the exporter or their authorized representative in the form prescribed in Appendix II of this Annex. The certificate shall be authenticated with a seal by an authority designated for this purpose by each Member State.
2. Every producer, where such producer is not the exporter, shall in respect of goods intended for export, furnish the exporter with a written declaration in conformity with Appendix III of this Annex to the effect that the goods qualify as originating in the Member State under the provisions of Rule 2 of this Annex.
3. The competent authority designated by an importing Member State may in exceptional circumstances and notwithstanding the presentation of a certificate issued in accordance with the provisions of this Rule, require, in case of doubt, further verification of the statement contained in the certificate. Member States, through their competent authorities, shall assist each other in this process. Such further verification should be made within three months of the request being made by a competent authority designated by the importing Member State. The form used for this purpose shall be that contained in Appendix IV to this Annex.
4. The importing Member State shall not prevent the importer from taking delivery of goods solely on the grounds that it requires further evidence, but may require security for any duty or other charge which may be payable: provided that where goods are subject to any prohibitions, the conditions for delivery under security shall not apply.
5. Copies of certificates of origin and other relevant documentary evidence shall be preserved by the appropriate authorities of the Member States for at least five years.
6. All Member States shall deposit with Secretariat the names of Departments and Agencies authorized to issue the certificates required under this Annex, specimen signatures of officials authorized to sign the certificates and the impressions of the official stamps to be used for that purpose, and those shall be circulated to the Member States by the Secretariat.

**RULE 10****INFRINGEMENT AND PENALTIES**

1. The Member States undertake to introduce legislation where such legislation does not exist, making such provision as may be necessary for penalties against persons who, in their territories, furnish or cause to be furnished documents which are untrue in any material sense, particularly in support of a claim in another Member State.
2. Any Member State to which an untrue claim is made in respect of the origin of goods shall immediately bring the issue to the attention of the exporting Member State from which the untrue claim is made, in accordance with the provisions on mutual assistance and co-operation in customs matters as contained in Appendix I of Annex II of this Protocol.
3. Continued infringement by a Member State of the provisions of this Annex may be dealt with in accordance with the provisions of Annex VI of this Protocol.

**RULE 11****DEROGATIONS**

1. Notwithstanding the provisions of Rules 2 and 3 of this Annex, derogations may be granted by the CMT where the development of existing industries is justified.
2. The Member State shall make the request for derogation for existing or new industries to be CMT.
3. In order to facilitate the examination of the request for derogation, the Member State making the request shall provide the CMT with the fullest possible information as to the reason for the request.
5. The CMT shall take steps necessary to ensure that a decision is reached as soon as possible and in any case not later than 90 working days after the request is received.
6. The derogation shall be valid for a specific period to be determined by the CMT.

**RULE 12****REGULATIONS**

The CMT shall adopt regulations to facilitate the implementation of this Annex.

**APPENDIX I TO ANNEX I OF THE PROTOCOL  
ON TRADE OF THE SADC**

**INTRODUCTORY NOTES TO THE LIST OF CONDITIONS REGARDING  
WORKING AND PROCESSING CARRIED OUT ON NON-ORIGINATING  
MATERIALS THAT CONFERS ORIGINATING STATUS**

**Note 1**

The list sets out the conditions required for all products to be considered as sufficiently worked or process as sufficiently worked or processed within the meaning of paragraph 2 of Rule 2 of Annex 1 of this Protocol.

**Note 2**

- 2.1 The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that System for that heading or chapter. For each entry in the first two columns a rule is specified in column 3. Where, in some cases, an "ex" precedes the entry in the first column, this signifies that the rules in column 3 apply only to the part of that headings described in column 2. Optional rules in column 4 only apply to textile and clothing products of HS chapters 50 to 63 exported by MMTZ to SACU under the quota system.
- 2.2 Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in columns 3 or 4 apply to all products which, under the Harmonised System are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3 Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4.

**Note 3**

- 3.1 The provisions of Rule 2 of Annex 1 of this Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the Region

For example, an engine of heading No. 8407, for which the rule may state that the value of non-originating materials which may be incorporated may not exceed a certain percentage of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading No. ex 7224.

1

If this forging has been forged in the Region from a non-originating ingot, it has already acquired originating status by virtue of the rule applicable to products of HS chapter 72 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the Region. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2 The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status. Thus if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.

- 3.3 When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

For example, the rule for fabrics of heading Nos. 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

- 3.4 Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles)

For example, in the case of an article of apparel of ex Chapter 62 made from non-originating yarn is allowed for this class of article, it is not possible to start from on-woven cloth, even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would at the stage before yarn, that is the fibre stage.

Note 4

- 4.1 The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
- 4.2 The term "natural fibres" includes horsehair of heading No. 0503, silk of heading Nos. 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos. 5101 to 5105, the cotton fibres of heading Nos. 5201 to 5203 and the other vegetable fibres of heading Nos. 5301 to 5305.
- 4.3 The terms "textile pulp", chemical materials" and "paper making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4 The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of heading Nos. 5501 to 5507.

## Note 5

- 5.1 The conditions set out in column 3 or 4 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 percent or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below).
- 5.2 However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- Silk,
- Wool,
- Coarse animal hair,
- Fine animal hair
- Horsehair
- Cotton
- Paper-making materials and paper
- Flax
- True hemp
- Jute and other textile bast fibre
- Sisal and other textile fibres of the genus Agave
- Coconut, abaca, ramie and other vegetable textile fibres.
- Synthetic man-made filaments, artificial man-made filaments
- Synthetic man-made staple fibres of polypropylene
- Synthetic man-made staple fibres of polyester
- Synthetic man-made staple fibres of polyamide,
- Synthetic man-made staple fibres of polyacrylonitrile,
- Synthetic man-made staple fibres of polyimide,
- Synthetic man-made staple fibres of polytetrafluoroethylene,
- Synthetic man-made staple fibres of polyphenylene sulphide
- Synthetic man-made staple fibres of polyvinyl chloride,
- Other synthetic man-made staple fibres,
- Artificial man-made staple fibres of viscose
- Other artificial man-made staple fibres
- Yarn made of polyurethane segmented with flexible segments of polyester whether or not glimpsed,
- Products of heading No. 5605 (metallised yarn,) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- Other products of heading No. 5605.

For example, a yarn of heading No. 5205 made from cotton fibres of heading No. 5203 and synthetic staple fibres of heading No. 5506 is mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which may require manufacture from chemical materials or textile pulp) may be used up to a weight of ten percent of the yarn.

For example, a woollen fabric of heading No. 5112 made from woollen yarn of heading No. 5107 and synthetic yarn of staple fibres of heading No. 5509 is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin rules (which may require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or other otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed ten percent of the weight of the fabric.

For example, tufted textile fabric of heading No. 5802 made from cotton yarn of heading No. 5205 and cotton fabric of heading No. 5210 is only a

mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarn used are themselves mixtures.

For example, if the tufted fabric concerned has been made from cotton yarn of heading No. 5205 and synthetic fabric of heading No. 5407, then, obviously, the yarns are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

- 5.3 In case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20 per cent in respect of this yarn.
- 5.4 In the case of products incorporating "strip consisting of a core of aluminum foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance is 30 per cent in respect of this strip.

Note 6

- 6.1 Textile materials, with the exception of linings, which do not satisfy the rule set out in the list in column 3 or 4 for the made-up product concerned may be used provided that they are classified in a heading other than that of the product and that their value does not exceed 8 per cent of the ex-works price of the product.
- 6.2 Without prejudice to Note 6.3, materials which are not classified within Chapter 50 to 63 may be used freely in the manufacture of textile products, whether or not they contain textiles.

For example, if a rule in the list provides that for particular textiles items yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified even though slide-fasteners normally contain textiles.

- 6.3 Where a percentage rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

**ADDITIONAL NOTES TO THE LIST OF WORKING OR PROCESSING  
REQUIRED TO BE CARRIED OUT ON  
NON-ORIGINATING MATERIALS IN ORDER THAT  
THE PRODUCT MANUFACTURED CAN OBTAIN ORIGINATING STATUS**

1. Wherever in column (3) of this Appendix the two words "no rule" appear, the goods classified under such chapters or headings shall not qualify for any preferences and the General rate of duty prescribed in Part 1 of Schedule No 1 shall apply to such goods.
2. Whenever the CMT agrees on any new list rule for any product in respect of which no list rule is prescribed at the time in column (3) or (4) or agree to amend any existing list rule, such agreed new list rule or amended list rule in respect of the specific chapter or heading as the case may be shall, when published as contemplated in section 55(1)(b) by notice in the Gazette, operate from a date so published and the goods the chapter or headings specified in such notice shall, on compliance with the conditions prescribed in such list and the other provisions of Annex 1, from such date qualify for the preferential rates of duty specified in the SADC column in Part 1 of Schedule No. 1.

**ANNEX VII OF THE PROTOCOL ON TRADE OF THE SADC  
CONCERNING TRADE IN SUGAR IN THE SOUTHERN AFRICAN  
DEVELOPMENT COMMUNITY**

**PREAMBLE**

The High Contracting Parties

**HAVING REGARD** to the objectives of this Protocol and of its importance as an instrument to facilitate the achievement of the aim of regional economic integration and the creation of a single market through increased harmonisation of policies and liberalisation of tariffs and removal of NTBs on trade;

**NOTING**, however, that the world sugar market is highly distorted and conscious of the fact that the world price for sugar is a dumped or subsidised price resulting in the continuing need for most sugar producing countries to impose tariffs and NTBs against the free importation of sugar in order to protect their domestic industries;

**RECOGNISING**, therefore, that for as long as the world sugar market remains highly distorted, sugar will be a product requiring special dispensation within the framework of this Protocol so that no sugar industry within the Region will suffer injury;

**MINDFUL** of the need to establish a stable investment climate leading to both growth and development of SADC economic and of the need to maintain the Region as a reliable block of world competitive low cost sugar producers, well positioned to take advantage of the anticipated higher world prices once global liberalisation in sugar trade occurs;

**ACKNOWLEDGING** the need to improve and maintain the efficiency of all sugar producers within the Region through the exchange of research, training and information;

**HEREBY AGREE** as follows:

## ARTICLE 1

### DEFINITIONS

In this Annex, an expression that has been defined in this Protocol has that meaning and, unless the context indicates otherwise:

“Marketing Year” means a period of twelve months commencing on 1 April and ending on 31 March, and

“annual” and “annum” shall have a corresponding meaning;

“MTTQ” means metric tons tel quell;

“Net surplus producer” means a sugar producing Member State, which has a net surplus production;

“Net surplus production” means the sugar wholly produced in any marketing year by a sugar producing Member State in excess of the sugar required to satisfy its total domestic consumption and to fulfil its preferential quotas granted by the European Union, the United States of America or any similar preferential quota granted to it or which may be granted to it in the future by any other third country block of third countries, and in the case of other Member States, the quantity of sugar per annum which are sold into SACU in terms of preferential trade agreements;

“Preferential quota” means a tariff rate quota with preferential customs duties applying under the quota limit;

“Sugar” means raw sugar, refined sugar and direct consumption crystal sugar;

“Technical Committee on Sugar (TCS)” means the body comprising representatives of Member States and sugar industries in all Member States;

“Ton” means a metric ton of sugar, tel quell.

## ARTICLE 2

### OBJECTIVES

The objectives of this Annex are:

- (a) to promote, within the Region, production and consumption of sugar and sugar-containing products according to fair trading conditions and an orderly regional market in sugar for the survival of the sugar industries in all sugar producing Member States, in anticipation of freer global trade;
- (b) in support of the long term objective set out in paragraph 1 of Article 3, to provide temporary measures to insulate Member States' sugar producing industries from the destabilising effects of the distorted global market and, in this regard, to harmonise sugar policies and regulate its trade within the Region during the interim period until world trade conditions permit freer trade in sugar;
- (c) to create a stable climate for investment, leading to the growth and development of sugar industries in the Member States;
- (d) to improve the competitiveness of the sugar producing Member States in the world sugar market;
- (e) to facilitate the sharing of information, research and training with a view to improving the efficiency of growers, millers and refiners of sugar in the Member States;

- (f) to facilitate the development of small and medium sugar enterprises; and
- (g) to create state market conditions in the Member States so as to encourage the rehabilitation and development of all sugar industries with a view to facilitating direct foreign investment and the creation of employment opportunities.

### **ARTICLE 3**

#### **RECIPROCAL MARKET LIBERALISATION**

The long-term objective of this Annex is to establish full liberalisation of trade in the sugar sector in the Region after the year 2012. Such liberalisation will be dependent on a positive review of conditions prevailing in the world sugar market five years after entry into force of this Annex in order to ascertain if the world sugar market has normalised sufficiently to make such liberalisation acceptable.

The liberalisation contemplated in paragraph 1 will be on a reciprocal basis and will also involve the removal of NTBs in relation to SADC sugar trade. However, in the interim period, market access will be on a non-reciprocal basis into the SACU on the terms outlined in Articles 4,5 and 6;

### **ARTICLE 4**

#### **NON-RECIPROCAL ACCESS TO THE SACU MARKET BASED ON MARKET GROWTH**

1. A portion of the SACU sugar market, based on the annual growth in that market, will be allocated to each SADC net surplus producer according to each producer's relative net surplus production.
2. The denominator for the calculation of each net surplus producer's share will be the total SADC net surplus production.
3. Annual growth of the SACU market will be deemed to be 45 tons in marketing year one, 91000 tons in marketing year two and 138 000 tons in marketing year three. In marketing years four and five the growth shall be reviewed on the basis of the actual growth in the SACU market during the prior three marketing years, with minimum access for these marketing years set at 138 000 tons.

### **ARTICLE 5**

#### **ADDITIONAL NON-RECIPROCAL ACCESS TO NON-SACU SADC SURPLUS SUGAR PRODUCING MEMBER STATES**

1. Duty free access to the SACU sugar market of 20 000 tons of sugar per annum shall be available to the non-SACU SADC surplus sugar producing Member States and will be allocated according to each producer's relative net surplus production.
2. The denominator for the calculation of each net surplus producer's share will be the total non-SACU SADC net surplus production.
3. In the event of the non-SACU SADC net surplus production being less than 20 000 tons, then the duty-free access to the SACU market shall be limited to the actual net surplus production.

**ARTICLE 6****GENERAL PROVISIONS RELATING TO MARKET ACCESS**

1. Access will be established through duty-free quotas extended to net surplus sugar produces.
2. Duty-free quotas, as contemplated in paragraph 1, will be calculated in each marketing year on when basis of production, consumption and export forecast for the year in question. Initial forecast will be submitted in February of each year based on production, consumption and export forecast for the coming marketing year, and reviewed at the end of June of that year. Access thus established will be adjusted in the succeeding marketing year or as soon as possible thereafter on the basis of actuals. Submitted forecasts will be reviewed by the TCS in consultation with the Member States.
3. The determined allocations are not transferable between Member States. In the case of force majeure, the quantities not supplied will be redistributed according to actual production, consumption and export figures of the remaining net surplus producers.
4. Quantities will be measured in MTTQ.
5. Any new sugar producer in the Region will be accommodated in this Annex.

**ARTICLE 7****CO-OPERATION IN AREAS OF COMMON INTEREST**

1. Co-operation in areas of common interest as identified by the TCS will be aimed at facilitating a balanced expansion of national industries with the ultimate objective of promoting the development of a regional competitive industry Co-operation in the following areas shall be established with a view to increasing efficiencies of all SADC sugar producers:
  - (a) The TCS, established in terms of Article 9, will initiate dialogue on the usage and sugar technology of infrastructure and adopt rules on the transfer of information in relation to sugar technology and research, training, promotion and marketing.
  - (b) Recognising established official customs cooperation arrangements, the TCS will make recommendations to such bodies on issues related to cross-broader trade in sugar in the Region aimed at improving information flows on trade in sugar in the Region and improving border control.
  - (c) Information on the nature and performance of existing national initiatives pertaining to the development of small-and medium size enterprises will be shared. Information on similar initiatives in other parts of the world will be collected and considered. Such information could be used to design appropriate strategies for small-and medium size enterprise development.
  - (d) Developments occurring in the rest of the world, which have implications for sugar industries in the Region, will be identified and monitored, and pro-active regional strategies will be pursued.
2. The TCS will establish terms of reference relation to the implementation of actions in the identified and new areas of co-operation, and may appoint technical working groups to obtain related information and submit recommendations.

**ARTICLE 8****IMPLEMENTATION**

1. Market access as provided for in Article 4 will be effected on 1 April 2001.
2. Market access as provided for in Article 5 will be effected upon implementation of this Annex but the access tonnage will be established pro rata to the period remaining to 31 March 2001.
3. Co-operation in areas of common interest will be effected on 1 September 2000.

**ARTICLE 9****INSTITUTIONAL FRAMEWORK**

1. The TCS is hereby established to manage the agreed terms for market access and to co-ordinate actions in the areas of co-operation outline in Article 7.
2. The TCS will establish a secretariat, the functions of which will be to implement and monitor the market access arrangements, procure and collate statistical information concerning sugar from Member States, disseminate such information amongst Member States, and supply secretarial services to the SADC Sugar Committee and its Working Groups.”.

**SECTION 4****PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR;  
TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES****NOTES:**

1. In this Section the Term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 per cent by mass.

**CHAPTER 16****PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS,  
OR OTHER AQUATIC INVERTEBRATES****NOTES:**

1. This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs and other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or heading No. 05.04.
2. Food preparations fall in this Chapter provided that they contain more than 20 per cent by mass of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter 16 corresponding to the component or components which predominate by mass. These provisions do not apply to the stuffed products of heading No. 19.02 or the preparations of heading No. 21.03 or 21.04.

**SUBHEADING NOTES:**

1. For the purposes of subheading 1602.10, the expression "homogenised preparations" means preparations of meat, meat offal or blood, finely homogenised, put up for retail as infant food or for dietetic purposes, in containers of a net mass content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading No. 16.02.
2. The fish and crustaceans specified in the subheadings of heading No. 16.04 or 16.05 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

2. References in heading No. 27.10 to "petroleum oils and oils obtained from bituminous minerals" include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the mass of the non-aromatic constituents exceeds that of the aromatic constituents. However, the references do not include liquid synthetic polyolefins of which less than 60 per cent by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (Chapter 39).

## SUBHEADING NOTES:

1. For the purposes of subheading No. 2701.11, "anthracite" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14 per cent.
2. For the purposes of subheading No. 2701.12, "bituminous coal" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14 per cent and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5,833 kcal/kg.
3. For the purposes of subheadings Nos. 2707.10, 2707.20, 2707.30, 2707.40 and 2707.60, the terms "benzole", "toluole", "xylole", "naphthalene" and "phenols" apply to products which contain more than 50 per cent by mass of benzene, toluene, xylene, naphthalene or phenols, respectively.

## ADDITIONAL NOTES:

1. If any goods mentioned in subheading No. 2710.00.12, 2710.00.13, 2710.00.14, 2710.00.15, are mixed with:
  - (a) Any goods not mentioned in the said subheadings such mixing shall not affect their classification under the said subheading provided such mixture is suitable for the same use as the goods mentioned in the said subheading; or
  - (b) Any other goods mentioned in any of the said subheadings, such mixture shall be classified under the subheading relating to the goods which predominate in the mixture on a mass basis unless the mixture is deemed to constitute goods classifiable under any subheading which does not relate to any of the constituents.
2. In this Chapter the following expressions shall be deemed to refer to hydrocarbon oils which are liquid at normal temperature and pressure and which comply with one or more of the specifications hereunder assigned thereto or with any other specifications accepted or determined by the Commissioner provided the principal use of such oils is considered by the Commissioner in every case to be as specified hereunder in respect of such oils:
  - (a) "Aviation Spirit"  
Principal use: Fuel in aircraft with spark ignition piston engines.  
Distillation: Between 10 per cent (v/v) and 40 per cent (v/v) distils over up to 75°C, not less than 50 per cent (v/v) distils over up to 150°C and not less than 90 per cent (v/v) distils over up to 135°C.

  - (a) Having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
  - (b) Presented together; and
  - (c) Identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

## CHAPTER 29

## ORGANIC CHEMICALS

## NOTES:

1. Except where the context otherwise requires, the headings of this Chapter apply only to the following:
  - (a) Except chemically defined organic compounds, whether or not containing impurities;
  - (b) Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (excluding stereoisomers), whether or not saturated (Chapter 27);
  - (c) The products of headings Nos. 29.36 to 29.39 or the sugar ethers and sugar esters, and their salts, of heading No. 29.40, or the products of heading No. 29.41, whether or not chemically defined;
  - (d) The products mentioned in (a), (b) or (c) above dissolved in water;
  - (e) The products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
  - (f) The products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
  - (g) The products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odorous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;
  - (h) The following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotisable amines and their salts.
2. This Chapter does not cover the following:
  - (a) Goods of heading No. 15.04 or crude glycerol of heading No. 15.20;
  - (b) Ethyl alcohol (heading No. 22.07 or 22.08);
  - (c) Methane or propane (heading No. 27.11);
  - (d) The compounds of carbon mentioned in Note 2 to Chapter 28;
  - (e) Urea (heading No. 31.02 or 31.05);
  - (f) Colouring matter of vegetable or animal origin (heading No. 32.03), synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading No. 32.04) or dyes or other colouring matter put up in forms or packings for retail sale (heading No. 32.12);
  - (g) Enzymes (heading No. 35.07);
  - (h) Metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300ml (heading No. 36.06);
  - (i) Products put as charges for fire-extinguishers or put up in fire-extinguishers grenades, of heading No. 38.13; ink removers put up in packings for retail sale, of heading No. 38.24; or
  - (j) Optical elements, for example, of ethylenediamine tartrate (heading No. 90.01).
3. Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.
4. In headings Nos. 29.04 to 29.06, 29.08 to 29.11 and 29.13 to 29.20, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.  
Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purposes of heading No. 29.29.  
For the purposes of headings Nos. 29.11, 29.12, 29.14, 29.18, and 29.22, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings Nos. 29.05 to 29.20.
5.

    - (ii) Salts formed between organic compounds of Subchapters I to X or heading No. 29.42 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter.
  - (d) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading No. 29.05).
  - (e) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.
6. The compounds of headings Nos. 29.30 and 29.31 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic, mercury or lead) directly linked to carbon atoms. Heading No. 29.30 (organo-sulphur compounds) and heading No. 29.31 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).
7. Headings Nos. 29.32, 29.33 and 29.34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.  
These provisions apply only when the ring-position hereto-atoms are those resulting solely from the cyclising function or functions here listed.

## SUBHEADING NOTE:

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned.

## CHAPTER 29

## ORGANIC CHEMICALS

## NOTES:

1. Except where the context otherwise requires, the headings of this Chapter apply only to the following:
  - (a) Except chemically defined organic compounds, whether or not containing impurities;
  - (b) Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (excluding stereoisomers), whether or not saturated (Chapter 27);
  - (c) The products of headings Nos. 29.36 to 29.39 or the sugar ethers and sugar esters, and their salts, of heading No. 29.40, or the products of heading No. 29.41, whether or not chemically defined;
  - (d) The products mentioned in (a), (b) or (c) above dissolved in water;
  - (e) The products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
  - (f) The products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
  - (g) The products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odorous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;
  - (h) The following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotisable amines and their salts.
2. This Chapter does not cover the following:
  - (a) Goods of heading No. 15.04 or crude glycerol of heading No. 15.20;
  - (b) Ethyl alcohol (heading No. 22.07 or 22.08);
  - (c) Methane or propane (heading No. 27.11);
  - (d) The compounds of carbon mentioned in Note 2 to Chapter 28;
  - (e) Urea (heading No. 31.02 or 31.05);
  - (f) Colouring matter of vegetable or animal origin (heading No. 32.03), synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading No. 32.04) or dyes or other colouring matter put up in forms or packings for retail sale (heading No. 32.12);
  - (g) Enzymes (heading No. 35.07);
  - (h) Metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300ml (heading No. 36.06);
  - (i) Products put as charges for fire-extinguishers or put up in fire-extinguishers, grenades, of heading No. 38.13; ink removers put up in packings for retail sale, of heading No. 38.24; or
  - (j) Optical elements, for example, of ethylenediamine tartrate (heading No. 90.01).
3. Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.
4. In headings Nos. 29.04 to 29.06, 29.08 to 29.11 and 29.13 to 29.20, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.  
Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purposes of heading No. 29.29.  
For the purposes of headings Nos. 29.11, 29.12, 29.14, 29.18, and 29.22, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings Nos. 29.05 to 29.20.
5.
  - (a) The esters of acid-function organic compounds of subchapters I to VII with organic compounds of these Subchapters are to be classified with that compound which is classified in the heading placed last in numerical order in these Subchapters.
  - (b) Esters of ethyl alcohol with acid-function organic compounds of Subchapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.
  - (c) Subject to Note 1 to Section VI and Note 2 to Chapter 28:
    - (i) Inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of Subchapters I to X or heading No. 29.42, are to be classified in the heading appropriate to the organic compound.
    - (ii) Salts formed between organic compounds of Subchapters I to X or heading No. 29.42 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter.
  - (d) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading No. 29.05).
  - (e) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.
6. The compounds of headings Nos. 29.30 and 29.31 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic, mercury or lead) directly linked to carbon atoms. Heading No. 29.30 (organo-sulphur compounds) and heading No. 29.31 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).
7. Headings Nos. 29.32, 29.33 and 29.34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.  
These provisions apply only when the ring-position hereto-atoms are those resulting solely from the cyclising function or functions here listed.

## SUBHEADING NOTE:

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned.

**SECTION 7****PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF****NOTES:**

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
  - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
  - (b) presented together; and
  - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complimentary one to another.
2. Except for the goods of heading No. 39.18 or 39.19, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

## CHAPTER 39

## PLASTICS AND ARTICLES THEREOF

## NOTES:

1. Throughout this Schedule the expression "plastics" means those materials of headings Nos. 39.01 to 39.14 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence. Throughout the Nomenclature any reference to "plastics" also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.
2. This Chapter does not cover:
  - (a) Waxes of heading No. 27.12 or 34.04;
  - (b) Separate chemically defined organic compounds (Chapter 29);
  - (c) Heparin or its salts (heading No. 30.01);

3. Headings Nos. 39.01 to 39.11 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
  - (a) Liquid synthetic polyolefins of which less than 60 per cent by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (headings Nos. 39.01 and 39.02);

  - (d) Silicones (heading No. 39.10);
  - (e) Resols (heading No. 39.09) and other prepolymers.
4. The expression "copolymers" cover all polymers in which no single monomer unit contributes 95 per cent or more by mass to the total polymer content.  
For the purposes of this Chapter, except where the context otherwise requires, copolymers (including copolycondensates, co-polycondensates, co-poly addition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by mass over every other single comonomer unit. For the purposes of this Note, constituent comonomers units of polymers falling in the same heading shall be taken together.  
If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.
5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
6. Heading No. 39.15 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (heading Nos. 39.01 to 39.14).
  - (a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
  - (b) Blocks or irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.
7. For the purposes of heading No. 39.17, the expression "tubes, pipes and hoses" means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1,5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
8. For the purposes of heading No. 39.18, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics, (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
9. In headings Nos. 39.20 and 39.21, the expression "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but no further worked (even if when so cut they become articles ready for use).

10. Heading No. 39.25 applies only to the following articles, not being products covered by any of the earlier headings of Subchapter 11:
- (a) Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300
  - (b) Structural elements used, for example, in floors, walls or partitions, ceiling or roofs;
  - (c) Gutters and fittings therefore;
  - (d) Doors, windows and their frames and thresholds for doors;
  - (e) Balconies, balustrades, fencing, gates and similar barriers;
  - (f) Shutters, blinds (including venetian blinds) and similar articles and parts and fittings thereof;
  - (g) Large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
  - (h) Ornamental architectural features, for example, flutings, cupolas, dovecotes; and
  - (i) Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets towel rails, switch-plates and other protective plates.

SUBHEADING NOTE:

1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:
- (a) Where there is a subheading named "Other" in the same series:
    - (i) The designation is in a subheading of a polymer by the prefix "poly" e.g., polythylene and dpolyamide -6,6 means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95 per cent or more by mass of the total polymer content.
    - (ii) The copolymers named in subheadings Nos. 3901.30, 3903.20, 3903.30 and 3904.30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95 per cent or more by mass of the total polymer content.
    - (iii) Chemically modified polymers are to be classified in the subheading named "Other", provided that the chemically modified polymers are not more specifically covered by another subheading.
    - (iv) Polymers not meeting (1), (2) and (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by mass over every single comonomer units. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared.
  - (b) Where there is no subheading named "Other" in the same series:
    - (i) Polymers are to be classified in the subheading covering polymers of that monomer units which predominates by mass over every other single monomer units. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared.
    - (ii) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.

ADDITIONAL NOTES:

1. For the purposes of headings Nos. 39.01 to 39.14 the word "powder" means product of which 90 per cent or more, by mass, passes through a sieve having a mesh aperture of 420 micrometers.
2. For the purposes of this Chapter the expression "heat shrinkable" has a bearing on products which at a temperature of 120°C have a shrinkage coefficient of 15 per cent or more.

## CHAPTER 40

## RUBBER AND ARTICLES THEREOF

## NOTES:

1. Except where the context otherwise requires, throughout this Schedule the expression "rubber" means the following products, whether or not vulcanised or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed;
2. This Chapter does not cover:
  - (a) Goods of Section XI (textiles and textile articles);
  - (b) Footwear or parts thereof of Chapter 64;
  - (c) Headgear or parts thereof (including bathing caps) of Chapter 65;
  - (d) Mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;
  - (e) Articles of Chapter 90, 92, 94 or 96; or
  - (f) Articles of Chapter 95 (other than sports gloves and articles of headings Nos. 40.11 to 40.13).
3. In headings Nos. 40.01 to 40.03 and 40.05 the expression "primary forms" applies only to the following forms:
  - (a) Liquids and pastes (including latex, whether or not prevulcanised, and other dispersions and solutions);
  - (b) Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In Note 1 to this Chapter and in heading No. 40.02, the expression "synthetic rubber" applies to:
  - (a) Unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by Note 5(b)(ii) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted;
  - (b) Thioplasts (TM); and
  - (c) Natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers, provided that all the above-mentioned products comply with the requirements concerning vulcanisation, elongation and recovery in (a) above.
5. (a) Headings Nos. 40.01 and 40.02 do not apply to any rubber or mixture of rubbers which has been compounded before or after coagulation, with:
  - (i) Vulcanising agents, accelerators, retarders, or activators (other than those added for the preparation of pre-vulcanised rubber latex);
  - (ii) Pigments or other colouring matter, other than those added solely for the purpose of identification;
  - (iii) Plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (b);
 (b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading NO. 40.01 or 40.02 as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
  - (i) emulsifiers or anti-tack agents;
  - (ii) small amounts of breakdown products of emulsifiers;
  - (iii) very small amounts of the following:
    - heat-sensitive agents (generally for obtaining thermosensitive rubber (latexes), cationic surface-active agents (generally for obtaining electro-positive rubber (latexes), antioxidants, coagulating, crumbling agents, freeze-resisting agents, peptises, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.
6. For the purposes of heading No. 40.04 the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly of vulcanised rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading No. 40.08.
8. Heading No. 40.10 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
9. In headings Nos. 40.01, 40.02, 40.03, 40.05 and 40.08 the expressions "plates", "sheets" and "strip" apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.

  - (c) having a brightness of less than 60 per cent, a caliper of 254 micrometers (microns) or less and an ash content more than 8 per cent.

Heading No. 48.02 does not, however, cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard.
5. In this Chapter, "kraft paper and paperboard" means paper and paperboard of which not less than 80 per cent by mass of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes.
6. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering to a description in two or more of the headings Nos. 48.01 to 48.11 are to be classified under that one of such headings which occurs last in numerical order in the Nomenclature.
7.

9. Heading No. 48.20 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.
  10. Heading No. 48.23 applies, INTER ALIA, to perforated paper or paperboard cards for Jacquard or similar machines and paper lace.
  11. Except for the goods of heading No. 48.14 or 48.21, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

**CHAPTER 54****MAN-MADE FILAMENTS****NOTES:**

1. Throughout this Schedule, the terms "man-made fibres" means staple fibres and filaments of organic polymers produced by manufacturing processes, either:
  - (a) By polymerisation of organic monomers, such as polyamides, polyesters, polyurethanes or polyvinyl derivatives; or
  - (b) by chemical transformation of natural organic polymers (for example, cellulose, casein, proteins or algae), such as viscose rayon, cellulose acetate, cupro or alginates.The terms "synthetic" and "artificial", used in relation to fibres, mean: SYNTHETIC - fibres as defined at (a); ARTIFICIAL - fibres as defined at (b). The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".
2. Headings Nos. 54.02 and 54.03 do not apply to synthetic or artificial filament tow of Chapter 55.

**CHAPTER 55****MAN-MADE STAPLE FIBRES****NOTES:**

1. Headings Nos. 55.01 and 55.02 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:
  - (a) Length of tow exceeding 2 m.
  - (b) Twist less than 5 turns/m.
  - (c) Measuring per filament less than 67 dtex.
  - (d) Synthetic filament tow only: The tow must be drawn, that is to say, be incapable of being stretched by more than 100 per cent of its length.
  - (e) Total measurement of tow more than 20 000 dtex.

CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF****NOTES:**

1. This Chapter does not cover the following:
  - (a) Wadding, felt or non-wovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading No. 34.01, polishes, creams or similar preparations of heading No. 34.05, fabric softeners of heading No. 38.09) where the textile material is present merely as a carrying medium;
  - (b) Textile products of heading No. 58.11;
  - (c) Natural or artificial abrasive powder or grain, on a backing of felt or non-wovens (heading No. 68.05);

  - (e) Metal foil on a backing of felt or non-wovens (Section XV).
2. The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.
3. Headings Nos. 56.02 and 56.03 cover respectively felt and non-wovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).  
Heading No. 56.03 also includes non-wovens in which plastics or rubber forms the bonding substance.  
Headings Nos. 56.02 and 56.03 do not, however, cover the following:
  - (a) Felt impregnated, coated, covered or laminated with plastics or rubber, containing 50 per cent or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);
  - (b) Non-wovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or
  - (c) Plates, sheets or strips of cellular plastics or cellular rubber combined with felt or non-wovens, where the textile material is present merely for reinforcing purposes (chapter 39 or 40).
4. Heading No. 56.04 does not cover the textile yarn, or strip or the like of heading No. 54.04 or 54.05, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

## CHAPTER 59

### IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR I

#### NOTES:

1. Except where the context otherwise requires, for the purposes of this Chapter the expression "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and headings Nos. 58.03 and 58.06, the braids and ornamental trimmings in the piece of heading No. 58.08 and the knitted or crocheted fabrics of heading No. 60.02.
2. Heading No. 59.03 applies to:
  - (a) Textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the mass per square metre and whatever the nature of the plastic material (compact or cellular) excluding:
    - (i) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
    - (ii) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15° and 30°C (usually Chapter 39);
    - (iii) Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);
    - (iv) Fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);
    - (v) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or
    - (vi) Textile products of heading No. 58.11.
  - (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading No. 56.04.
3. For the purposes of heading No. 59.05, the expression "textile wall coverings" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading No. 48.14) or on a textile backing (generally heading No. 59.07).
4. For the purposes of heading No. 59.06, the expression "rubberised textile fabrics" means:
  - (a) Textile fabrics impregnated, coated, covered or laminated with rubber,
    - (i) of a mass of not more than 1,500 g/m<sup>2</sup>; or
    - (ii) of a mass of more than 1,500 g/m<sup>2</sup> and containing more than 50 per cent by mass of textile material;
  - (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading No. 56.04;
  - (c) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading No. 56.04;

This heading does not, however, apply to plates, sheets or strips of cellular rubber combined with textile fabric, where the textile fabric is present merely for re-inforcing purposes (Chapter 40), or textile products of heading No. 58.11.
5. Heading No. 59.07 does not apply to:

- (a) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapter 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour; Fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like); Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapter 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
  - (b) Fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like);
  - (c) Fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments;  
However, imitation pile fabrics remain classified in this heading.
  - (d) Fabrics finished with normal dressings having a basis of amylaceous or similar substances;
  - (e) Wood veneered on a backing of textile fabrics (heading No. 44.08);
  - (f) Natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading No. 68.05);
  - (g) Agglomerated or reconstituted mica, on a backing of textile fabrics (heading No. 68.14); or
  - (h) Metal foil on a backing of textile fabrics (Section XV).
6. Heading No. 59.10 does not apply to:
- (a) Transmission or conveyor belting of textile material, a thickness of less than 3 mm; or
  - (b) Transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading No. 40.10).
7. Heading No. 59.11 applies to the following goods, which do not fall in any other heading of Section XI:
- (a) Textile products in the piece, cut to length or simply cut to rectangular (including square) shape (excluding those having the character of the products of heading Nos. 59.08 to 59.10), the following only:
    - (i) Textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams);
    - (ii) Bolting cloth;
    - (iii) Straining cloth of a kind used in oil presses or the like, of textile material or of human hair;
    - (iv) Flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;
    - (v) Textile fabrics reinforced with metal, of a kind used for technical purposes;
    - (vi) = Cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;

## CHAPTER 61

### ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED

#### NOTES:

1. This Chapter applies only to made up knitted or crocheted articles.
2. This Chapter does not cover the following:
  - (a) Goods of heading No. 62.12;
  - (b) Worn clothing or other worn articles of heading No. 63.09; or
  - (c) Orthopaedic appliances, surgical belts, trusses or the like (heading No 90.21).
3. For the purposes of headings Nos. 61.03 and 61.04:
  - (a) The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

One suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the suit and whose back is made from the same fabric as the lining of the suit coat or jacket; and

one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric. If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind; and

dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.
  - (b) The term "ensemble" means a set of garments (excluding suits and articles of heading No. 61.07, 61.08 or 61.09), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

one garment designed to cover the upper part of the body, with the exception of pull-overs which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment; and

one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (excluding swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading No. 61.12.
4. Headings Nos. 61.05 and 61.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Heading No. 61.05 does not cover sleeveless garments.

5. Heading No. 61.09 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.
6. for the purposes of heading No. 61.11:
- (a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;
  - (b) Articles which are, PRIMA FACIE, classifiable both in heading No. 61.11 and in other headings of this Chapter are to be classified in heading No. 61.11.
7. For the purposes of heading No. 61.12 "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:
- (a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
  - (b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
    - one garment such as an anorak, wind-cheater, windjacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
    - one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.
- The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.
- All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.
8. Garments which are, PRIMA FACIE, classifiable both in heading No. 61.13 and in other headings of this Chapter, excluding heading No. 61.11, are to be classified in heading No. 61.13.
9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.
- Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.
10. Articles of this Chapter may be made of metal thread.

## CHAPTER 70

## GLASS AND GLASSWARE

## NOTES:

1. This Chapter does not cover the following:
  - (a) Goods of heading No. 32.07 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
  - (b) Articles of Chapter 71 (for example, imitation jewellery);
  - (c) Optical fibre cables of heading No. 85.44, electrical insulators (heading No. 85.46) or fittings of insulating material of heading No. 85.47;
  - (d) Optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of Chapter 90;
  - (e) Lamps and lighting fittings, illuminated signs, illuminated name-plates and the like, having a permanently fixed light source, and parts thereof of heading No. 94.05;
  - (f) Toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or
  - (g) Buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.
2. For the purposes of headings Nos. 70.03, 70.04 and 70.05:
  - (a) Glass is not regarded as "worked" by reason of any process it has undergone before annealing;
  - (b) Cutting to shape does not affect the classification of glass in sheets;
  - (c) The expression "absorbent, reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (e.g. metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.
3. The products referred to in heading No. 70.06 remain classified in that heading whether or not they have the character of articles.
4. For the purposes of heading No. 70.19, the expression "glass wool" means:
  - (a) Mineral wools with a silica ( $\text{SiO}_2$ ) content not less than 60 per cent by mass;
  - (b) Mineral wools with a silica ( $\text{SiO}_2$ ) content less than 60 per cent but with an alkaline oxide ( $\text{K}_2\text{O}$  or  $\text{Na}_2\text{O}$ ) content exceeding 5 per cent by mass or a boron oxide ( $\text{B}_2\text{O}_3$ ) content exceeding 2 per cent by mass.

Mineral wools which do not comply with the above specifications fall in heading No. 68.06.
5. Throughout this Schedule, the expression "glass" includes fused quartz and other fused silica.

## SUBHEADING NOTE:

1. For the purposes of subheadings Nos. 7013.21, 7013.31 and 7013.91, the expression "lead crystal" means only glass having a minimum lead monoxide ( $\text{PbO}$ ) content by mass of 24 per cent.

## ADDITIONAL NOTE:

1. For the purpose of this Chapter, the expression "optical glass" means special glasses used in the manufacture of optical instruments for photography, astronomy, observation (for example, microscopy, navigation), armaments (for example, sighting telescopes), laboratories or for the manufacture of corrective spectacle lenses. These glasses are highly transparent. They may have special light absorptive properties and therefore be coloured or black. They are clear, homogeneous, without air bubbles, and have refractive indices and dispersive powers unusual in other glasses.

In Chapters 73 to 76 and 78 to 82 (but not in heading No. 73.15) references to parts of goods do not include references to parts of general use as defined above.

Subject to the preceding paragraph and to Note 1 to Chapter 83, the articles of Chapter 82 or 83 are excluded from Chapters 72 to 76 and 78 to 81.

Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under General Note A to this Schedule containing two or more base metals are to be treated as articles of base metal predominating by mass over each of the other metals. For this purpose:

- (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;
- (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 3, it is classified; and
- (c) A cermet of heading No. 81.13 is regarded as a single base metal.

1. This Section does not cover the following:

- (a) Prepared paints, inks or other products with a basis of metallic flakes or powder (heading Nos. 32.07 to 32.10, 32.12, 32.13 or 32.15);

These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods).

(m) Other Bars and Rods

Products which do not conform to any of the definitions at (ij), (k) or (l) above or to the definition of wire, which have a uniform solid cross-section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may -

-- Hollow bars and rods of any cross-section, suitable for drills, of which the greatest external dimension of the cross-section exceeds 15 mm but does not exceed 52 mm, and of which the greatest internal dimension does not exceed one half of the greatest external dimension. Hollow bars and rods of iron or steel not conforming to this definition are to be classified in heading No. 73.04.

2. Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by mass.

3. Iron or steel products obtained by electrolytic deposition, by pressure casting or by sintering are to be classified, according to their form, their composition and their appearance, in the headings of this Chapter appropriate to similar hot-rolled products.

SUBHEADING NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Alloy Pig Iron:

Pig iron containing, by mass, one or more of the following elements in the specified proportions:

more than 0,2 per cent of chromium

more than 0,3 per cent of copper

more than 0,3 per cent of nickel

more than 0,1 per cent of any of the following elements: aluminium, molybdenum, titanium, tungsten (wolfram), vanadium.

(b) Non-alloy Free-cutting Steel:

more than 0,05 per cent of bismuth

(c) Silicon-electrical Steel:

Alloy steels containing by mass at least 0,6 per cent but not more than 6 per cent of silicon and not more than 0,08 per cent of carbon. They may also contain by mass not more than 1 per cent of aluminium but no other element in a proportion that would give the steel the characteristics of another alloy steel.

(d) High Speed Steel:

Alloy steels containing, with or without other elements, at least two of the three elements molybdenum, tungsten and vanadium with a combined content by mass of 7 per cent or more, 0,6 per cent or more of carbon and 3 to 6 per cent of chromium.

(e) Silico-manganese Steel:

Alloy steels containing by mass:

not more than 0,7 per cent of carbon;

0,5 per cent or more but not more than 1,9 per cent of manganese; and

0,6 per cent or more but not more than 2,3 per cent of silicon, but no other element in a proportion that would give the steel the characteristics of another alloy steel.

2. For the classification of ferro-alloys in the subheadings of heading No. 72.02 the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1 (c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" referred to in Chapter Note 1 (c) must each exceed 10 per cent by mass.

**CHAPTER 73****ARTICLES OF IRON OR STEEL****NOTES:**

1. In this Chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by mass over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1(d) to Chapter 72.
2. In this Chapter the word "wire" means hot or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

CHAPTER 74  
COPPER AND ARTICLES THEREOF

## NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Refined Copper

Metal containing at least 99,85 per cent by mass of copper; or

Metal containing at least 97,5 per cent by mass of copper, provided that the content by mass of any other element does not exceed the limit specified in the following table:

TABLE – Other elements

Element	Limiting content percentage by mass
Ag – Silver	0,25
As – Arsenic	0,5
Cd – Cadmium	1,3
Cr – Chromium	1,4
Mg – Magnesium	0,8
Pb – Lead	1,5
S – Sulphur	0,7
Sn – Tin	0,6
Te – Tellurium	0,8
Zn – Zinc	1
Zr – Zirconium	0,3
Other elements*, each	0,3

\* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

(b) Copper Alloys

(c) Master Alloys

Alloys containing with other elements more than 10 per cent by mass of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals.  
However, copper phosphide (phosphor copper) containing more than 5 per cent by mass of phosphorus falls in heading No. 28.48.

(d) Bars and Rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after productions (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

(e) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

(f) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width).

In the case of heading No. 74.14, however, the terms "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

(g) Plates, Sheets, Strip and Foil

Flat-surfaced products (excluding the unwrought products of heading No. 74.03), coiled or not, of solid rectangular (excluding square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

of a shape (excluding rectangular or square), of any size, provided they do not assume the character of articles or products of other headings.

Headings Nos. 74.09 and 74.10 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided they do not thereby assume the character of articles or products of other headings.

(h) Tubes and Pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTE:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Copper-zinc base alloys (brasses)

Alloys of copper and zinc, with or without other elements. When other elements are present:

Zinc predominates by mass over each of such other elements;

Any nickel content by mass is less than 5 per cent (see copper-nickel-zinc alloys (nickel silvers)); and

Any tin content by mass is less than 3 per cent (see copper-tin alloys (bronzes)).

(b) Copper-tin base alloys (bronzes)

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by mass over each of such other elements, except that when the tin content is 3 per cent or more the zinc content by mass may exceed that of tin but must be less than 10 per cent.

(c) Copper-nickel-zinc base alloys (nickel silvers)

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 per cent or more by mass (see copper-zinc alloys (brasses)).

(d) **Copper-nickel base alloys**

Alloys of copper and nickel, with or without other elements but in any case containing by mass not more than 1 per cent of zinc. When other elements are present, nickel predominates by mass over each of such other elements.

## CHAPTER 75

### NICKEL AND ARTICLES THEREOF

#### NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and Rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified-rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) Plates, Sheets, Strip and Foil

Flat-surfaced products (excluding the unwrought products of heading No. 75.02), coiled or not, of solid rectangular (excluding square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

of a shape (excluding rectangular or square), of any size, provided they do not assume the character of articles or products of other headings.

Heading No. 75.06 applies, INTER ALIA to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided they do not thereby assume the character of articles or products of other headings.

(e) Tubes and Pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

## SUBHEADING NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Nickel, not alloyed

Metal containing by mass at least 99 per cent of nickel plus cobalt, provided:

- (i) the cobalt content by mass does not exceed 1,5 per cent, and  
 (ii) the content by mass of any other element does not exceed the limit specified in the following table:

TABLE – Other elements

Element	Limiting content percentage by mass
Fe Iron	0,5
O Oxygen	0,4
Other elements, each	0,3

(b) Nickel alloys

Metallic substances in which nickel predominates by mass over each of the other elements provided:

- (i) the content by mass of cobalt exceeds 1,5 per cent,  
 (ii) the content by mass of at least one of the other elements is greater than the limit specified in the foregoing table, or  
 (iii) the total content by mass of elements (excluding nickel plus cobalt) exceeds 1 per cent.

2. Notwithstanding the provisions of Chapter Note 1(c), for the purposes of subheading No. 7508.10 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

## CHAPTER 78

## LEAD AND ARTICLES THEREOF

## NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

## (a) Bars and Rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified-rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

## (b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

## (c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

## (d) Plates, Sheets, Strip and Foil

Flat-surfaced products (excluding the unwrought products of heading No. 78.01), coiled or not, of solid rectangular (excluding square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

of a shape (excluding rectangular or square), of any size, provided they do not assume the character of articles or products of other headings.

Heading No. 78.04 applies, *INTER ALIA*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided they do not thereby assume the character of articles or products of other headings.

## (e) Tubes and Pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

## CHAPTER 85

### ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION I

#### NOTES:

1. This Chapter does not cover the following:
  - (a) Electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;
  - (b) Articles of glass of heading No. 70.11; or
  - (c) Electrically heated furniture of Chapter 94.
2. Headings Nos. 85.01 to 85.04 do not apply to goods described in heading No. 85.11, 85.12, 85.40, 85.41 or 85.42. However, metal tank mercury arc rectifiers remain classified in heading No. 85.04.
3. Heading No. 85.09 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes:
  - (a) Vacuum cleaners, floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any mass;
  - (b) Other machines provided the mass of such machines does not exceed 20 kg.  
The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading No. 84.14), centrifugal clothes-dryers (heading No. 84.21), dish washing machines (heading No. 84.22), household washing machines (heading No. 84.50), roller or other ironing machines (heading No. 84.20 or 84.51), sewing machines (heading No. 84.52), electric scissors (heading No. 85.08) or to electrothermic appliances (heading No. 85.16).
4. For the purposes of heading No. 85.34 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, except elements which can produce, rectify, modulate or amplify an electrical signal (for example, semi-conductor elements).  
The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances.  
Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading No. 85.42.
5. For the purposes of headings Nos. 85.41 and 85.42:
  - (A) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;
  - (B) "Electronic integrated circuits and micro-assemblies" are:
    - (a) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, interconnections, etcetera) are created in the mass (essentially) and on the surface of a semiconductor material (doped silicon, for example) and are inseparably associated;
    - (b) Hybrid integrated circuits in which passive elements (resistors, capacitors, interconnections, etcetera), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etcetera), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, on a single insulating substrate (glass, ceramic, etcetera). These circuits may also include discrete components;
    - (c) Microassemblies of the moulded module, micromodule or similar types, consisting of discrete, active or both active and passive, components which are combined and interconnected.

For the classification of the articles defined in this Note, headings Nos. 85.41 and 85.42 shall take precedence over any other heading in this Schedule which might cover them by reference to, in particular, their function.

6. Records, tapes and other media of heading No. 85.23 or 85.24 remain classified in those headings, whether or not they are presented with the apparatus for which they are intended.
7. For the purposes of heading No. 85.48, "spent primary cells, spent primary batteries and spent electric accumulators" are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, not capable of being recharged.

**SUBHEADING NOTE:**

1. Subheadings Nos. 8519.92 and 8527.12 cover only cassette players with built-in amplifiers, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

**ADDITIONAL NOTE:**

1. For the purposes of this Chapter the expression "recorded books as defined in Additional Note 1 to Chapter 85" means the oral narration of the text of printed publications, recorded onto gramophone records, magnetic tapes, compact discs or similar media without any added commentary.

AND PARTS AND ACCESSORIES THEREOF****NOTES:**

1. This Chapter does not cover railway or tramway rolling-stock designed solely for running on rails.
2. For the purposes of this Chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilisers or other goods.  
Machines and working tools designed for fitting to tractors of heading No. 87.01 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.
3. Motor chassis fitted with cabs fall in headings Nos. 87.02 to 87.04, and not in heading No. 87.06.
4. Heading No. 87.12 includes all children's bicycles. Other children's cycles fall in heading No. 95.01.

  - (a) Clock or watch glasses or weights (classified according to their constituent material);
  - (b) Watch chains (headings No. 71.13 or 71.17, as the case may be);
  - (c) Parts of general use defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading No. 17.15). Clock or watch springs are, however, to be classified as clock or watch parts (heading No. 91.14);
  - (d) Bearing balls (heading No. 73.26 or 84.82, as the case may be);
  - (e) Articles of heading No. 84.12 constructed to work without an escapement.

  - (g) Articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).
2. Heading No. 91.01 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of headings Nos. 71.01 to 71.04. Watches with case of base metal inlaid with precious metal fall in heading No. 91.02.
3. For the purposes of this Chapter, the expression "watch movements" means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.
4. Except as provided in Note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this Chapter.
